## PROFILE

- Senior Software Architect specializing in production-grade AI systems—agentic AI, RAG, and natural-language interfaces with a track record of leading cross-functional engineering teams to deliver scalable solutions. Actively targeting relocation to the Netherlands.
- Proven track record of defining architecture standards and aligning multi-team delivery for 80+ engineers, driving **~70% velocity improvement, 60% rework reduction, and 0 missed deliveries** over 2+ years.

## EXPERIENCE

### Senior Software Architect (Director, AI Engineering)

December 2025 – Present

*Teleperformance*

*Bangalore, India*

- Architected **FAB Connect** and **FAB Growth**, enterprise BPO platforms connecting CCaaS providers (Genesys, Amazon Connect, Parloa) to **Databricks Lakehouse** (OLAP) and **Postgres** (OLTP).
- Built **Node.js/TypeScript/Fastify** microservices on **AKS** with Drizzle ORM; delivered **React SPA** (ShadCN, Tailwind) via Azure Static Web Apps.
- Led **FAB Growth RaaS platform** design, ingesting cross-platform lead data to deliver **autonomous, agentic support** to sales teams.

**Tech Stack:** Node.js, TypeScript, Fastify, React, Databricks, Postgres, Azure (AKS, Static Web Apps)

### Career Break — Family Caregiving

February 2025 – December 2025

### Staff Software Engineer

April 2022 – January 2025

*Soroco*

*Bangalore, India*

- Led frontend architecture for **Scout** (Angular 9→18), unifying ad-hoc multi-team development into a cohesive platform with a **shared component library**, **WCAG accessibility**, Redux state management, code quality gating, and **10+ parameterized CI/CD pipelines** (PR validation, ACR container builds, semver-gated releases, and flexible environment deployments with mock or live backend).
- Transformed frontend from development bottleneck to fastest delivery team as primary reviewer for **22 developers across 5 teams**—standardized components drove **~70% velocity improvement and 60% rework reduction** across **80+ engineers**, with FE ultimately owning API contract definitions.
- Co-designed NLP **text-to-SQL system** (RoBERTa-Large, Llama 70B, 80%+ accuracy), built **privacy-preserving data obfuscation pipeline** (l-diversity, Python/Pandas, 30GB+ datasets), and developed **vector embedding similarity detection** for real-time workflow automation.

**Tech Stack:** Angular 18, React/NextJs, Python+Django, PyTorch, Scikit-learn, Pandas, Postgres, MongoDB, Azure (VMs, Functions, Vault, DevOps, Pipelines), Docker

### Senior Software Engineer

February 2020 – April 2022

*Soroco*

*Bangalore, India*

- Built automation system for Amazon analyzing **1.5M weekly/monthly payrolls** for discrepancies, reducing multi-day manual process to **under 3 hours** (2-hour automated run + 1-hour human verification).
- Led compliance and security updates across 4 teams to meet **Amazon's payroll data handling and privacy policies**, ensuring uninterrupted production operations across rapidly evolving regulatory requirements.

### Associate Technical Architect

March 2018 – January 2020

*SVAM International*

*Noida, India*

- Led 10-member cross-functional team to design and develop **.NET MVC 5 EMR** for 20/20 Vision Center and GVS, a telehealth franchise with **500+ locations across 38 US states**, replacing legacy solution.
- Cut **10-month data migration to 2 months** for Mitel Networks by leading 6-person analytics team to build **Python/Pandas automation** that cleaned **900,000+ customer records**, automating **80% of manual effort**.

## SKILLS

**Languages:** Python, TypeScript/JavaScript, SQL, C#, HTML/CSS, LaTeX

**ML/AI:** PyTorch, Scikit-learn, Transformers/HuggingFace, LLMs (Llama, RoBERTa), NLP, LangChain, NumPy, SciPy

**Frameworks/Libraries:** Angular, React/NextJS, Pandas, Django, Node.js, Flask, .NET Core

**Databases/Data:** Postgres, MongoDB, MySQL, MSSQL, Redshift

**Developer Tools:** Git, Docker, K8s, Azure, AWS, GCP

## EDUCATION

### Amity University

*Bachelor of Science in Information Technology*

Noida, UP, India

May 2013
