PROFILE

- Senior Software Architect specializing in production-grade AI systems—agentic AI, RAG, and natural-language interfaces with a track record of leading cross-functional engineering teams to deliver scalable solutions. Actively targeting relocation to the Netherlands.
- Proven track record of defining architecture standards and aligning multi-team delivery for 80+ engineers, driving **~70% velocity improvement, 60% rework reduction, and 0 missed deliveries** over 2+ years.

EXPERIENCE

Senior Software Architect (Director, AI Engineering)

December 2025 – Present

Teleperformance

Bangalore, India

- Architecting **AI-native BPO platforms** (FAB Connect & FAB Growth): CCaaS data ingestion (Genesys, Amazon Connect, Parloa) through to **agentic AI delivery**—end to end.
- Designed pipeline to **Databricks Lakehouse** (OLAP analytics) and **Postgres** (OLTP) for real-time observability and AI training data.
- Led **FAB Growth RaaS platform**: cross-platform lead data pipelines delivering **autonomous, agentic sales support**.

Tech Stack: Node.js, TypeScript, Fastify, React, Databricks, Postgres, Azure (AKS, AI Foundry, Static Web Apps)

Career Break—Family Caregiving

February 2025 – December 2025

Staff Software Engineer

April 2022 – January 2025

Soroco

Bangalore, India

- Co-designed and built core components of NLP text-to-SQL system using **RoBERTa-Large** and **schema-tuned Llama 70B**, achieving **80%+ query accuracy** with **<200ms SQL generation latency**, enabling non-technical users to query complex datasets via natural language.
- Designed **privacy-preserving data obfuscation pipeline** using **l-diversity** with **Python/Pandas** and dynamic batching, converting **30GB+ production datasets** into training data for dozens of ML models.
- Developed **user action similarity detection system** using **vector embeddings** and cosine similarity to identify ongoing user workflows in real time, enabling contextual assistance and automation.
- Led frontend architecture for **Scout** (Angular 9→18), establishing **shared component library**, CI/CD pipelines, and architecture standards for **22 developers across 5 teams**—transforming FE from bottleneck to fastest delivery team with **~70% velocity improvement and 60% rework reduction**.

Tech Stack: Angular 18, React/NextJS, Python+Django, PyTorch, Scikit-learn, Pandas, Postgres, MongoDB, Azure (VMs, Functions, Vault, DevOps, Pipelines), Docker

Senior Software Engineer

February 2020 – April 2022

Soroco

Bangalore, India

- Cut multi-day payroll discrepancy review to **under 3 hours** (2-hour automated run + 1-hour human verification) by building automation that analyzed **1.5M Amazon weekly and monthly payrolls**.
- Led compliance and security updates across 4 teams to meet **Amazon's payroll data handling and privacy policies**, ensuring uninterrupted production operations across rapidly evolving regulatory requirements.

Associate Technical Architect

March 2018 – January 2020

SVAM International

Noida, India

- Led 10-member cross-functional team to design and develop **.NET MVC 5 EMR** for 20/20 Vision Center and GVS, a telehealth franchise with **500+ locations across 38 US states**, replacing legacy solution.
- Cut **10-month data migration to 2 months** for Mitel Networks by leading 6-person analytics team to build **Python/Pandas automation** that cleaned **900,000+ customer records**, automating **80% of manual effort**.

SKILLS

Languages: Python, TypeScript/JavaScript, SQL, C#, HTML/CSS, LaTeX

ML/AI: PyTorch, Scikit-learn, Transformers/HuggingFace, LLMs (Llama, RoBERTa), NLP, RAG, Agentic AI, LangChain, NumPy, SciPy

Frameworks/Libraries: Angular, React/NextJS, Pandas, Django, Node.js, Flask, .NET Core

Databases/Data: Postgres, MongoDB, MySQL, MSSQL, Redshift

Developer Tools: Git, Docker, K8s, Azure (OpenAI, AI Foundry, VMs, Functions, DevOps), AWS, GCP

EDUCATION

Amity University

Bachelor of Science in Information Technology

Noida, UP, India

May 2013
